CABINET LIGHTING

OXO

THE EXPERIENCE OF
FOUR GENERATIONS.

With the LOOX5 LED lighting system by Häfele it is easy to develop and plan flexible light ideas. The flexibility is a result of a wide selection of different components ranging from light fixtures to switches.

After four generations of development and research our comprehensive range of downlights, strip lights and drawer lighting ensure the perfect atmosphere for your project every time.

PLANNING TIPS

What We Recommend

For ease of plumbing, place a dishwasher near the sink and allow a minimum 600mm space to 'house' it.

Allow a minimum 450mm either side of the cooktop for safety and extra working space.

Leave space between a cabinet and your wall so doors can be fully opened and the cabinet easily accessed.

Allow a minimum 1.2m between opposite cabinets for maneuverability.

Allow a minimum 650mm between your cooktop and rangehood.

What Not To Do

Don't place tall tapware in front of an opening window.

Don't place drawers in a corner where they can block other cabinets.

Don't place a cooktop next to a wall where it can cause overheating. Allow a minimum 450mm on either side.

Don't install a full set of drawers next to a cooktop. This can provide easy access to a hot cooking area for young children.

Don't place your dishwasher or stove in the corner where it could block access to other cabinets.

& TIPS

Kitchen Design Example

Kitchen Design Example
Shown here is a sample of a kitchen design. This design highlights the cupboards used, and indicates where panels should be used. You'll notice that we have marked in a solid line, indicating the wall perimeter of the kitchen.
